You can edit the purchases and subscriptions deliveryÂ page.

1. Depending on the login a client uses, they will either see the GeneralÂ Purpose login version or an individual membership version. You will findÂ the general purpose login link on the Manage > Links page which is alsoÂ were you can find a link of individual membership login pages.

2. If a person logs in using a General Purpose Login link they will beÂ taken to the general purchases and subscriptions list page. You mayÂ customize this page using customization boxes found on your mainÂ Nanacast Profile. If you have a viral premium level account you willÂ have more customization options for this page than the Viral level alone.

3. To customize an Access the Content page you will see those options onÂ the edit listing step of creating a membership in the wizard or managingÂ it. You will see more customization options at the Viral Premium LevelÂ than the viral level.

4. For individual memberships you can set a "default" episode thatÂ automatically redirects a person upon login to a individual membershipÂ or upon clicking the access the content link for an individualÂ membership from the general purpose login page they will be redirectedÂ to automatically. You may assign any episode to be a "default episode"Â but in order for them to be directed to it, it must be deliveredÂ immediately or they must have passed the day for which it was scheduledÂ to be displayed.Â

In addition to the detailed descriptions and instructions above, I will add that on an individual membership... when you go to the manage page you can click on the edit listing link and on the listing step of the wizard or on that edit listing page if you scroll down you will see additional options for customization of the individual membership's purchases and subscriptions page where the access the content link is displayed.... if you have a viral premium level account you see more customization options for that page which is also the first step of the wizard.
