Nanacast does not provide email services... instead we integrate with AWeber, so you can keep your subscribers in AWeber.

Nanacast can also add and remove subscribers from AWeber. You will find a Nanacast parser listed inside your AWeber account under email parsers.

You will also find a video explaining the Nanacast/AWeber integration on our How To page link from the top right of Nanacast.com

We integrate with AWeber, Getresponse, iContact, Contact Contact, Mail Chimp, Analytic Approach, and Send Pepper.
