---

This plugin is unnecessary, as our system is far superior, has far more features, and we offer a WP plugin, Member Lock (more info found on the Advanced Integration & API section of our our How To page.) We make things like Wishlist obsolete.

However, for those who wish to take advantage of Nanacast features and still use Wishlist, one of our clients has created a WP plugin based on Wishlist and MemberLock. Registered Nanacast publishers may request more information via the Support Desk.
